NEW SOUTH WALES

STATISTICAL REGISTER.

1934-35.

PREFACE.

THE six sectional parts of this volume have already been issued separately, and are now presented collectively, accompanied by a General Index covering the subjects treated. Every care has been taken to keep the work free from errors but if any have escaped detection it would be deemed a favour if their nature were indicated.

The figures should be read in conjunction with the "Official Year Book of New South Wales."

The Government Statistician wishes to express his thanks to the Commonwealth Statistician, to the responsible officers of the various State and Commonwealth Departments, and to others, who have kindly supplied all desired information, often at considerable trouble.

Bureau of Statistics and Economics,
Sydney, 1*st December,* 1936.

No. 20.—Imports Overseas, 1934-35.

(*From 1st July*, 1934, *to 30th June*, 1935.)

Note.—With the exception of United Kingdom, Irish Free State, and New Zealand, and in cases where a single country is concerned, only those countries are shown under each article where the value of import exceeds £500. Particulars in the following table refer to "Country of Origin": details of country of direct shipment are not available.

Value of Imports.—The value of goods imported from countries beyond Australia is recorded in British currency and represents the amount on which duty is payable or would be payable if the duty were *ad valorem.* Section 154 (1) of the Customs Act, 1901–1930, provides that "when any duty is imposed according to value, the value for duty shall be the sum of the following :—

(*a*) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction; or
(ii) the current domestic value of the goods, whichever is the higher;
(*b*) all charges payable or ordinarily payable for placing the goods free on board at the port of export; and
(*c*) ten per centum of the amounts specified under paragraphs (*a*) and (*b*) of this subsection."

"Current domestic value" is defined as "the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country."

Quantities.—Generally, but not invariably, quantities have been shown in the ordinary trade unit. Where imports have been declared in packages without an indication of the number, capacity, or weight of the articles imported, the values only have been inserted.

N.E.I. means "Not elsewhere included."

Import Duties.—The duties charged on Imports into New South Wales during the year ended 30th June, 1935, were collected in accordance with the Customs Tariff, 1933, and subsequent Tariff Proposals, submitted to Parliament, up to and including proposals dated 28th March, 1935.

Where reference has been made by footnote against any article in this table, more complete details may be obtained on reference to the Customs Statistical Classification.

NOTE.—Imports are shown in British currency values. Owing to the high rate of Exchange, operating since 1930, the recorded value of Imports is not comparable with that of the Exports. For relative currency values, see Tables Nos. 3, 4, 5, 6, 7, and 8, pages 16, 17 and 18.

Gross Duty received—£11,756,281.

No. 21.—Exports Oversea, 1934-35.

(From 1st July, 1934, to 30th June, 1935.)

Note.—With the exception of the United Kingdom, Irish Free State, and New Zealand, and in cases where a single country is concerned, only those countries are shown under each article where the value of the export exceeded £250.

Goods exported overseas are shown under two headings :—" Australian Produce " and " Total." " Australian Produce " comprises (i) Raw materials produced in Australia; (ii) Articles manufactured therefrom; and (iii) Articles wholly or partly manufactured in Australia from imported materials.

The difference between the value of Australian produce exported and the total export represents the re-export of articles produced elsewhere than in Australia.

Value of Exports.—The value of goods exported (including cost of containers) is recorded in Australian currency, and is, generally, the value of the principal markets of the Commonwealth in the ordinary commercial acceptation of the term, except for the following commodities, concerning which an alteration in the method of valuation of exports was made as follows :—

From 1st July, 1929 :—*Sugar* (*a*) sold in Australia for export : The value, f.o.b., at which the sugar is sold to oversea buyers; (*b*) shipped on consignment : The f.o.b. equivalent of the ruling price of such sugar in the London markets.

Goods on which bounty or rebate is payable on export—the value in the principal markets of the Commonwealth less the amount of any bounty or rebate.

From 1st July, 1930—*Wool* (*a*) sold in Australia for export—the actual price paid for the wool plus the cost of all services incurred in placing the wool on board ship; (*b*) shipped on consignment—the f.o.b. equivalent of ruling Australian prices.

From 1st July, 1932—*Wheat* (*a*) sold in Australia for export : The f.o.b. equivalent of the price at which the wheat was sold; (*b*) shipped on consignment : The f.o.b. equivalent of the current selling price overseas.

From 1st April, 1934—*Butter** (*a*) sold in Australia for export : The f.o.b. equivalent of the price at which the butter was sold; (*b*) shipped on consignment : The f.o.b. equivalent of the current ruling price overseas.

From 1st July, 1934.—*Flour* (*a*) sold in Australia for export : The f.o.b. equivalent of the price at which the flour was sold; (*b*) shipped on consignment : The f.o.b. equivalent of ruling Australian prices.

Quantities.—Generally, though not invariably, quantities have been shown in the ordinary trade unit. Where exports are declared in packages, without an indication of the number, capacity, or weight of the articles exported, only the values are inserted.

N.E.I.—Means " Not elsewhere included."

Ships' Stores.—Goods shipped as ships' stores on board oversea ships have not been included in exports. For ships' stores, see Table No. 22.

Note.—Exports are shown in Australian currency values. Owing to the adverse exchange rate operating since 1930, the value of exports is not comparable with that of the imports. For relative currency values, see Tables Nos. 3, 4, 5, 6, 7, and 8, pages 16, 17 and 18.

No. 47.—Harbour and Wharfage Rates, 1935.

Harbour and Wharfage Rates in the port of Sydney are collected by the Sydney Harbour Trust and in other ports by the Department of Navigation of New South Wales. Inward rates are payable in respect of goods brought by sea for landing, and outward rates on goods shipped on a vessel. Special inward rates are prescribed for certain articles produced and shipped within the Commonwealth, and the inward rates for other goods are those shown under the heading of General Rates. At ports other than Sydney separate schedules of rates apply to coastwise goods. In Sydney Harbour outward rates are not levied on any consignment under 5 cwt. or 10 cubic feet. Goods transhipped are subject to transhipment rates, and not to inward or outward harbour or wharfage rates. Passengers' luggage is exempt.

STORAGE CHARGES—Port of Sydney.—If goods remain on unleased wharves longer than six days after the final discharge of a vessel, wharf storage charges are levied against the owner or agent of the owner of the vessel as follows:—4d. per ton per day for the first week, 5d. for the second week, 6d. for the third week, and 7d. thereafter. If goods remain on unleased wharves longer than two days after being received for shipment, the wharf storage charge is 1d. per ton per day. For the purpose of calculating this charge one ton is considered as representing 630 feet super in the case of logs and 384 feet super in the case of sleepers.

The charges for storing timber at certain wharves, after two days, are at the rate per day of 1d. per ton during the first four days, thereafter 3d.

SHED CHARGES—Port of Sydney.—A charge for each day, or part of a day, is made against the owner or agent of a vessel using any section of a shed on an unleased wharf, calculated at the rate of one-tenth of a penny for each square foot of floor space comprised in the section, whether such section be wholly, or partly used.

---

† The transhipment rates payable on all primary and secondary products to be exported as cargo overseas shall be twenty (20) per cent less than the rates specified in this section.

(See Table 21.)

NOTE.—The difference between the actual Loan Expenditure stated below and the Public Debt, as shown in No. 1, and following tables is due to the fact that the outstanding debt represents the gross amount sold, while the expenditure is the net amount after deducting discount and expenses of flotation and allowing for debit balance of Loan Account.

No. 22.—Distribution of Total Loan Expenditure to 30th June, 1935.*

NOTE.—The total loan expenditure has no necessary relation to the public debt, although at times the amounts are approximately the same. The former is continually increasing according to the amount of loan moneys spent annually, while the public debt outstanding may be either reduced by the redemption of loans from revenue or increased by the issue of new loans, and may include large sums in hand.

* Public Debt includes Funded Debt, Advances by Commonwealth Government, Closer Settlement Debentures, and Overdrafts on General Loan Account and on Loans Expenditure Suspense Account. ‡ Excludes £4,773,213 deposited with Note Issue Department, Commonwealth Bank, London, and £6,427,465 Conversion Loan in London, proceeds to be credited in 1933–34. (*a*) £7,531,261 was Funded in 1935 and included in Stock and Debentures, and the rebate of £934,722 transferred to Special Deposits Account.

No. 24.—Public Debt*—Amount Sold, Redeemed, and Outstanding, 1900–1935.

NOTE.—The difference between the amounts outstanding at the close of each year does not, as a rule, represent the actual increase or decrease in the Debt. Repayments of loans are generally effected under the head of renewals, and in following out this practice, it is usually found necessary to float the redeeming loan some time before the due date of the maturing loan; hence the liability may appear twice in the Debt Statement till the bonds or stocks are retired.

* Information not supplied in all cases.

Amount of Consideration.—Many mortgages do not state the amount lent under them, and many discharges do not disclose the amount received in consideration. The figures representing "Amount of Consideration" under both these heads are therefore considerably less than the amounts actually advanced or repaid.

Sums secured by Lien on Wool and by Mortgage of Sheep.—When any sum has been secured, both by a lien on the wool and by a mortgage of the sheep, the amount is included under both heads.

In 1930 the gross amount lent on liens was £3.279,949, in 1931 £3,568,911, in 1932 £2,458,365, in 1933 £2,589,565, in 1934 £2,988,131, and in 1935 £2,730,660, but from these amounts has to be deducted the sum of £1,311,597 in 1930, £863,286 in 1931, £717,179 in 1932, £316,357 in 1933, £785,985 in 1934, and £552,325 in 1935, secured both by lien on the wool and mortgage on the sheep, so that the net amount lent on lien was £1,968,352, £2,705,625, £1,741,186, £2,273,208, £2,202,146 and £2,178,335 in the respective years.

Mortgages on Wool and Crops discharged.—Liens on wool and on growing crops mature at the end of each season, and terminate without formal discharge. During 1931 there were 88, during 1932, 116, during 1933, 90, during 1934, 124, and during 1935, 124 formal discharges of wool liens registered, representing £55,715 in 1931, £95,550 in 1932, £90,467 in 1933, £67,623 in 1934 and £61,182 in 1935.

NOTE.—Many mortgages of Stock come to an end without formal discharge.

No. 92.—Number and Value of Estates of Deceased Persons, and Settlements, Classified—Year ended 30th June, 1935.

Note.—The rates of duty quoted were imposed under the Stamp Duties Act, 1920, which came into force on the 1st January, 1921, as amended by the Stamp Duties Amendment Acts, 1931 and 1933. Half rates are charged if the property passes to the widow or children under 21 years of age, if the total net value of the estate is under £5,000. Total exemption is granted in the case of local domicile where estate is under the value of £500, and if under £1,000, property passing to widow and/or children under 21 years of age is exempt.

* Includes estates on which no duty has been paid as property passes to widow and/or children under 21 years.

† In the case of local domiciles the rate of duty payable is 2 per cent. for estates from £500 to £1,000.

** Additional value of estates on which duty has been paid in previous years has been included in several groups

¶ Foreign estates exceeding £75,000 in value are chargeable with a flat rate of 25 per cent.

LOCAL GOVERNMENT.

EXPLANATORY NOTE.

The tables in this section were compiled from returns and statements of account furnished by the various local governing bodies under the provisions of the Local Government Act, 1919, except in the case of the City of Sydney, which is governed by the Sydney Corporation Act.

Prior to 1934 certain municipalities were classified as "Extra Metropolitan." These have now been inserted in alphabetical order under "Metropolitan."

Councils' Accounts are kept on the Income and Expenditure system of accounting, and, for the purposes of the Local Government Act, are divided into General Fund, Special Funds in respect of special rates levied, Local Funds in respect of local rates levied, and Trading Funds. A Revenue Account and a Balance Sheet are compiled for each fund.

In the aggregate statements of Income and Expenditure which follow, details of sources of Income and functions of Expenditure of General, Special and Local Funds are combined under the heading of Ordinary Services, whilst totals of Trading and Water and Sewerage Accounts, stated separately, are analysed in later tables.

Balance Sheets of Local Governing Bodies are divided into two sections, viz., "Available Funds," in which are included liquid assets and current liabilities, and "Invested Funds," embracing fixed assets, investments, debtors on extended terms and long-term liabilities. Tables Nos. 105 and 124 show the nature of assets and liabilities without differentiating between Available and Invested Funds, the balances only of which accounts are indicated in Tables Nos. 106 and 125.

The financial operations of councils are displayed in Tables of "Income and Expenditure" (Nos. 103, 104, 122 and 123) and "Transactions on Invested Funds Account" (Nos. 106 and 125), which should be studied conjointly.

Expenditure chargeable to Revenue, shown in Tables Nos. 104 and 123, includes, in addition to normal recurring items of Expenditure, costs incurred in respect of construction works, such as roads and bridges, and other objects having long life not being "realisable assets" or for use in performing works or in rendering services, even though financed by long-term borrowing. It excludes payments made in the redemption of indebtedness, notwithstanding that funds for this purpose have been provided from revenue collections.

Transactions on Invested Funds Account (Tables Nos. 106 and 125) exhibit particulars of financial transactions other than those coming within the ambit of "Revenue and Expenditure chargeable thereto." On the credit side of the account are shown Capital Expenditure and payments on redemption of indebtedness. Headings on the debit side indicate the extent to which Expenditures, both revenue and capital, have been financed by long-term borrowing, and the amount written off fixed assets to provide for depreciation, obsolescence and sales. The effect of treatment in this manner of depreciation and obsolescence, is to offset the inclusion of a similar amount in Expenditure chargeable to Revenue, which does not result in an actual money outgo, being included for the purpose of assessing true costs of works and services.

The object sought to be attained by councils in their financial administration is the arrangement in a year of sufficient finance to meet commitments incurred. For this purpose they have available for use the balance of current finances brought forward from the previous year, annual Revenue accrued, and, when appropriate works are undertaken, recourse to borrowing. The degree of success achieved in this respect is indicated in the last three columns of Tables Nos. 103 and 122, dealing with "Net Transactions on Available Funds Account." The first two columns comprise details of the combination of net Revenue transactions and net transactions on Invested Funds Account. In the final column, "Surplus," where shown, indicates the extent to which current finances, or the balance of Available Funds Account, has been supplemented as a result of a year's operations, whilst a "Deficiency," representing a depletion of Available Funds balance, is denoted by a minus sign.

Assets in the nature of undertakings or agreements by the Main Roads Board to repay Loans, or to subsidise Councils in the repayment of Loans and Time Payment Debts, in respect of main roads' works, have been excluded from councils' balance sheets, the councils affected being the municipalities of Alexandria, Ashfield, Botany, Canterbury, Darlington, Drummoyne, Ermington and Rydalmere, Glebe, Hunters' Hill, Kogarah, Ku-ring-gai, Lane Cove, Manly, Marrickville, Mascot, Mosman, North Sydney, Parramatta, Penrith, Petersham, Randwick, Redfern, Richmond, Rockdale, St. Mary's, Waterloo, Waverley, Willoughby, Woollahra, and the Shire of Warringah.

No. 97.—Municipalities—Valuations and Rates for year ended 31st December, 1934.

NOTE.—In this table the *Unimproved Capital Value* is the amount which the fee-simple estate in such land is worth under such reasonable conditions as a *bonâ-fide* seller would require, assuming the actual improvements had not been made.

The *Improved Capital Value* is the amount which the fee-simple estate of the land is worth, with all improvements and buildings thereon.

The *Assessed Annual Value* is nine-tenths of the fair average rental of land with improvements thereon.

Religious Instruction.—Under the Public Instruction Act (43 Vic. No. 23), which came into force on 1st May, 1880, it is provided that the instruction imparted at Public Schools must be absolutely unsectarian. "Secular instruction" is defined by the Act as including "general religious teaching as distinguished from dogmatical or polemical theology." Provision is made for authorised teachers of any denomination to give religious instruction at specified hours to the scholars belonging to their religion, and separate class rooms are provided generally for this purpose. The total number of visits paid to State schools during 1934 by authorised teachers was 124,850, namely :- Church of England 56,268; Roman Catholic, 6,636; Presbyterian, 20,490; Methodist, 25,143; other Denominations, 16,313.

Subsidised Schools.—Subsidies are granted only in the case of children resident in thinly-populated country districts, so far removed from any Public School that attendance is impracticable. The conditions are that where a private teacher is engaged by two or more families in combination, or by a single family with not less than three children of school age, such teacher, if approved by the Minister, may be paid subsidy as follows :—

"In the Eastern portion of the State at a minimum rate of £30 per annum, based on the average monthly attendance, such aid not to exceed £110 yearly. In the Western section the minimum and maximum rates per annum are £33 and £120 respectively. The Western portion of the State consists of that area within which living allowances are granted to Officers under the Public Service Board."

These courses meet a distinct demand for the super-primary education of children attending schools in more or less sparsely-populated localities. The number of schools engaged in this work at the end of 1934 was 529, having an effective enrolment of 4,066 post-primary pupils, with an average attendance of 3,348.

The Teachers' College, Sydney, provides various courses preparing students for positions as rural school teachers, primary kindergarten, and secondary school assistant teachers. Courses range from two to four years, leading to graduation in Arts or Science. In addition to academic work at the College, students are given practical work in the Demonstration Schools at Forest Lodge, North Newtown, and Haberfield, and at selected supplementary practice schools. The number of volumes in the College Library is 42,840.

The Teachers' College at Armidale was established in February, 1928, with the object of training country pupils. The course extends over two years only. In 1934 the enrolment consisted of 55 first year and 107 second year students. The number of volumes in the College Library is 4,640.

Under its Charter, the University of Sydney may confer, after examination, degrees in Arts, Law, Medicine, Science, Engineering, Dentistry, Veterinary Science, Agriculture, Economics, and Architecture; but not in Theology and Divinity. Graduates of Sydney University rank equally with graduates of British Universities.

Under the Act of 1884 women have all University privileges; and degrees may be granted to women in all branches of knowledge.

WAGES.

No. 89.—Rates of Wages in Various Industries, December, 1935.

The Rates of Wages, shown in the following table, are the minima prescribed by awards of Industrial tribunals or by registered agreements, in terms of the industrial arbitration laws of the State of New South Wales or of the Commonwealth of Australia. For a few occupations, for which wages are not prescribed by award or agreement, average ruling rates have been stated. The rates relate to the metropolitan district except in the following cases:—Mining, shipping, agricultural and pastoral industries, and certain works in country districts for which special awards have been made, viz.: cement works at Portland and the iron and steel works at Port Kembla and Newcastle.

Living Wage and Family Allowances.—The wages prescribed by awards and agreements are based on "living" or "basic" rates of which details are shown in Table No. 90. Where there is more than one dependent child under 14 years of age in the family, allowances may be paid by the State, in terms of the Family Endowment Act, to supplement the family income. The maximum rate is 5s. per week for each such child (except one) in the family, and the amount is reduced where necessary so that it will not raise the family income (as defined by the Act) above the amount of the living wage declared by the Industrial Commission of New South Wales, plus 5s. a week for each child for whom endowment is payable.

Wages Tax.—Since 1st July, 1930, wages have been subject to a special levy which was imposed primarily to provide funds for the relief of unemployment. The tax as at 31st December, 1934, was as follows :—Wages at rates ranging from 40s. to 50s. per week, tax 9d.; 50s. 1d. to 60s., tax 1s. 3d.; 60s. 1d. to 70s., tax 1s. 9d.; over 70s., tax 1s. on first £2, plus 1d. on each 2s. 6d. of next £2, plus 1d. on each 2s. of the balance. The following rates became effective from 1st January, 1936,—Wages from 40s. to 50s. per week, tax 6d.; 50s. 1d. to 60s., tax 9d.; 60s. 1d. to 70s., tax 1s. 3d., 70s. 1d. to 72s. 5d., tax 1s. 6d; 72s. 6d. to 74s. 11d., tax 1s. 7d; 75s. to 77s. 5d., tax 1s. 8d. 77s. 6d. to 79s. 11d., tax 1s. 9d; 80s. to 81s. 11d., tax 1s. 11d.; 82s. to 83s. 11d., tax 2s.; 84s. to 85s. 11d., tax 2s. 2d.; 86s. to 87s. 11d. tax 2s. 3d., 88s. to 89s. 11d., tax 2s. 5d.; 90s. to 91s. 11d., tax 2s. 6d.; 92s. to 93s. 11d., tax 2s. 8d.; 94s. to 95s. 11d., tax 2s. 9d.; 96s. to 97s., 11d. tax 2s. 11d.; 98s. to 99s. 11d., tax 3s.; wages £5 per week and over, tax 1s. on the first £2, plus 1s. 4d. on the next £2, plus 1d. on each 2s. of the balance.

Hours of Work.—In industries within the scope of the State Industrial Arbitration laws the hours are prescribed by the Industrial Commission of New South Wales, the general standard is 44 hours per week. In the Commonwealth jurisdiction, the hours are prescribed by awards and agreements and are usually 44 or 48 per week.

* Under the provisions of the Public Service Salaries Acts, 1931–35, the rates are reduced by $8\frac{1}{3}$ per cent. in respect of salaries not exceeding the living wage, and the higher salaries have been reduced according to a scale in which the rates range from 15 per cent. on the part of a salary which does not exceed £200 per annum to $32\frac{1}{2}$ per cent. on the part over £1,500. From 1st July, 1934, the amount of deduction was reduced by 20 per cent. and provision was made for rebates from deductions prescribed in respect of salaries of married male officers and officers with dependants. From 1st April, 1935, the total amount of deduction was reduced by 40 per cent. and provision was made that salaries of married male officers and of officers with dependants should not be reduced below £300 per annum; also that salaries of officers in this group in receipt of less than £300 per annum should not be reduced.

No. 90.—Living or Basic Wages—1925 to 1935.

The wage-regulating tribunals exercising jurisdiction under State or Federal law base their determinations upon " living " or " basic " wages representing the minimum rates which may be prescribed for adult unskilled workers. When the living or basic rates are varied on account of changes in the cost of living all rates of wages in awards or agreements affected thereby are varied by the same amount of increase or decrease as the living wage.

Living Wage—State Awards and Agreements.—The wages for men and women prescribed by State awards and agreements are based on a standard rate, fixed by the Industrial Commission of New South Wales for the whole State and subject to adjustment in April and October of each year to accord with increase or decrease in the cost of maintaining a standard of living determined by the Commission. The changes in the living wages for men and women since August, 1925, are shown in the table.

Basic Wages—Commonwealth Awards and Agreements.—In the Commonwealth jurisdiction there is not uniformity as to the basic rate, or the method of periodical adjustment, or the interval between adjustments. These matters are determined for each award or agreement, with regard to such factors as special circumstances of the industry concerned or the area in which the wage determinations must be observed. Nevertheless the basic rates shown in the following table are fairly representative of those prescribed for Sydney and Newcastle by the majority of Commonwealth awards and agreements which provide for quarterly adjustments of wages according to the movement of the Commonwealth Statistician's index numbers of retail prices in these localities. By order of the Commonwealth Court of Conciliation and Arbitration, operating from 1st June, 1934, the basic rates are not varied unless the change amounts to at least 2s. a week. The basic rates for men as at the end of the years 1925–1935 are shown in the table. A basic rate for women is not assessed except in special cases.

Family Unit.—The living wage for men declared by the State industrial authority in August, 1925, covered the maintenance of a man, wife, and two children. The declaration of June, 1927, related to man and wife only, and the living wage was supplemented by family allowances at the rate of 5s. per week for each dependent child under 14 years of age, but the alteration in the family unit was not actually reflected in the living wage declaration until December, 1929. For this and later declarations, one child was included in the family unit and excluded from family endowment. With the exception of one per family, children under 14 years of age in all families (wage earners' and non-wage earners') are eligible for endowment, provided it does not raise the family income above the prescribed limit.

NOTE.—Particulars include estates administered by the Public Trustee.

Gross and Net Value of Estates.—The figures from the Probate Court and from the Stamp Duties Department (see Part "Public Finance") relating to transactions in the estates of deceased persons do not agree. The Court gives the gross value of the estates, and includes those estates which, after investigation, are found not to be subject to duty. The number of petitions is also swollen by probates and letters of administration on some estates being taken out a second time. The amount given by the Stamp Duties Department represents the net value of the estates.

* The above figures include prisoners received into gaol more than once, but do not include persons who were convicted and released direct from the Court. The number of distinct persons received under sentence was 6,350 males and 407 females; Total, 6,757.

† In addition to the 36 Habitual Criminals, there are 52 others declared, and who are included in the various sentences, as they have not yet completed their definite period. There are also 2 in the Criminal Division of the Mental Hospitals not included in these figures. Thirty-five males were declared Habitual Criminals in 1934-35.

Punishment inflicted on Prisoners for breaches of discipline.—During 1935, ·85 per cent. of the prisoners received punishment, and the offences were generally of a trivial character. There have been no floggings, ironings, or other severe forms of punishment, and the dark cells were abolished years ago.

Gaol Libraries.—The Gaol Libraries contain 26,777 carefully selected volumes for recreation and instruction of prisoners after working hours.

NOTE.—The above prices for sheep represent the averages for all sheep, whether shorn or woolly but as a general rule in January and February the fat sheep at market are shorn; during March and April they have growing fleece; from May to August they are woolly and in September, October, November, and December they comprise both shorn and woolly.

‡ Although Homestead Grants are perpetual leases, they are virtually alienated and have therefore been included in this table.

Surrenders, Exchanges, and Road Resumptions.—Surrenders and exchanges are effected under Sections 195, 196, and 197 of the Crown Lands Consolidation Act, 1913, and Road Resumptions are treated under the Public Roads Act. 1902. As land is exchanged for land without any monetary consideration the extent of the area of Crown Lands is not thereby affected.

Resumptions and Purchases.—The total alienations represent the gross area, no allowances being made for the gifts of land and the resumptions and direct purchases made from private owners on behalf of the various Departments for particulars of which see Table No. 89.

NATIONAL PARKS.—The following parks within the metropolitan area, as defined above, are specially mentioned on account of their national character; The National Park, 33,832 acres, at Port Hacking; Kurnell Park, Captain Cook's landing-place, southern headland of Botany Bay, 248 acres; Ku-ring-gai Chase, 35,373 acres, on Hawkesbury River; Centennial Park, 474 acres; Parramatta Park, 252 acres at Parramatta.

TRUSTEES OF PARKS.—Under the Public Parks Act, the Governor may appoint Trustees of any lands proclaimed for the purposes of public recreation, convenience, health or enjoyment. The Trustees are empowered to frame by-laws for the protection of shrubs, trees, etc., upon the land vested in them, and regulate the use and enjoyment of such land by the public.

RURAL HOLDINGS (One Acre and upwards).

No. 91.—Alienated Lands—Area and Capital Value—and Crown Lands Occupied in Shires and Municipalities—1934-35.

NOTE.—The alienated areas in this and subsequent tables include all lands—consisting of one acre and upwards upon which agricultural or pastoral pursuits are carried on—wholly alienated, and those in process of alienation. The various forms of tenure are shown in the Land Settlement section of this Part.

The names indented are of Municipalities situated within the Shire under the name of which they are indented.

*The returns for 1920 and succeeding years include holdings over 1 acre in extent on which improvements had been effected, and upon which agricultural or pastoral activities were conducted. Prior to 1920 many holdings, nearly all from 1 to 5 acres in extent were included, which were not used for agricultural or pastoral purposes.

The definition of Unimproved Capital Value and Improved Capital Value will be found in the Part relating to Local Government.

* From the year 1919–20 the returns were collected from holdings over one acre in extent on which improvements had been effected, and upon which agricultural or pastoral activities were conducted; in that they covered all lands, particulars of which serve a practical purpose. In previous years many holdings, nearly all from 1 to 5 acres in extent were included, which were not used for agricultural or pastoral purposes.

Section III.—METEOROLOGY.

The Tables in this Part have been compiled from particulars furnished by the Commonwealth Meteorologist.

No. 96.—Barometric Observations, Sydney, 1935.

Time Ball.—The Time Ball at the Sydney Observatory is dropped every day at 1 p.m. Standard Time. The Time Ball at Newcastle is controlled by signals from the Sydney Observatory.

Standard Time.—The mean time of the 150th meridian of longitude east of Greenwich, England, is the Standard Time throughout New South Wales, with the exception of the area within the Municipal District of Broken Hill and the Electorate of Sturt, for which the mean time of the 135th meridian of east longitude is adopted.

Position of Sydney Observatory.—Latitude, 33° 51′ 41·1″ south; longitude, 151° 12′ 23·10″ east; altitude, 138 feet.

Month.	Self-registering Barograph, corrected to 32° Fah. and Standard Gravity at Lat. 45°, but not to Mean Sea-level. Height above mean sea level :—138 feet.						Mean Height of Standard Barometer, corrected to 32° Fah. Gravity and Mean Sea-level.

Thermometers.—Up till April, 1917, the thermometers were exposed in a shed 11 feet square, of which the sides were 5 feet 6 inches high, and enclosed to within about 30 inches of the ground with open lattice work. The roof was conical, rising to 13 feet above the ground, and was covered with louvres close enough to keep out rain. From April, 1917, the thermometers have been exposed in a standard Stevenson screen.

NOTE.—The above tables are based upon the records of the Commonwealth Meteorologist. The divisions correspond approximately with the statistical divisions shown on the map in the frontispiece of the Official Year Book of New South Wales and listed in tables in other parts of this Volume. Where divisions in the above table are subdivided into two sections the letters N, S, E or W indicate the northern, southern eastern or western portion of the division concerned.

NOTE.—The above table shows the ratio of actual to normal rainfall each month, the normal rainfall being the average over a long period of years ended 1929.

No. 109.—Meteorological Conditions, New South Wales, 1934.

The year 1934 was characterized by a tropical air drift, which persisted practically throughout the year and was responsible for cyclonic storms, many of which were exceptionally severe.

The rainfall was phenomenal, both as regards quantity and distribution, and almost the whole of the state received considerably above the average amount for the year. A dry period, however, was experienced in inland areas from March until June and sowing was greatly hampered. Abundant rains followed, particularly in the late spring, storms, hail and floods causing much damage in a number of districts.

Temperature.—Mean temperatures throughout the year were about normal. A severe heat wave occurred in January, sultry and oppressive conditions prevailed in February, and March was also hot. The first part of April was comparatively mild, but in the second half a cold snap was responsible for numerous frosts. May was also a mild month, marked by frequent fogs. Severe frosts were a feature of June, but the rest of the winter was mild, with a persistence of cloudy conditions. Spring was notable for depressed temperatures during the day and mild conditions at night.

The highest temperature recorded during the year was 114 degrees at White Cliffs on 22nd December, and the lowest 2 degrees at Charlotte Pass on 21st July and again on 16th August.

Wind.—The greatest wind velocity recorded at Sydney was 59 miles per hour on 2nd February. High winds occurred on 78 days and gales on 31 days.

The following is a resume of the weather conditions prevailing during each month of the year.

January.—Severe thunderstorms accompanied with torrential rains occurred throughout the state during this month, particularly towards the end of the first week. These resulted in disastrous floods in the South Coast, in the Snowy River Valley and also in the Upper Murrumbidgee area. Severe heat was experienced throughout the second half of the month, the highest temperature recorded being 112 degrees at Euston and Wentworth on the 24th. A cold snap prevailed on the Southern Highlands on the 10th, when the low temperature of 27 degrees was recorded at Charlotte Pass.

February.—Stormy conditions and the passage of two cyclones were responsible for abundant rainfall in February. The month was exceptionally sultry with a high humidity.

The highest temperature was 109 degrees at Tibooburra on the 11th and the lowest 31 degrees at Kosciusko on the 16th.

March.—Dry conditions prevailed, particularly over a large section of the north-west, where no rain fell. Prolonged heat was experienced inland, but frosts occurred on the Southern Highlands during the last week.

The highest temperature recorded was 112 degrees at White Cliffs on the 9th and the lowest, 27 degrees at Kosciusko on the 3rd.

April.—Heavy rains resulting in floods were experienced in the coastal area during April, and useful showers fell in many inland districts.

Mild, humid weather prevailed for the most part, but a pronounced cold snap in the last week brought snow to the Southern Highlands and portion of the Central Districts.

The highest temperature was 98 degrees at White Cliffs on the 4th, and the lowest 23 degrees at Charlotte Pass on the 23rd.

May.—Exceptionally dry conditions prevailed over Inland Districts during this month, but Coastal Districts received an abundant rainfall. The month was mild, frosts were rarely severe, but fogs were unusually numerous.

The highest temperature was 84 degrees at Coonamble, and the lowest 9 degrees at Kiandra.

June.—Dry conditions were experienced over inland New South Wales until the last week of June, when excellent rains fell, and the seasonal outlook was greatly improved in consequence. Cold nights and frosts were frequent. Snowstorms occurred in the Southern Alps and fogs were numerous in the South-eastern quarter.

The highest temperature recorded was 81 degrees at Grafton on 10th, and the lowest 6 degrees at Charlotte Pass on the 19th.

July.—Tropical storms were responsible for bountiful statewide rains during July, and extensive flooding occurred in low lying areas. Generally, the month was mild, snow being confined to the Southern Tablelands, but severe frosts ruled inland about the middle of the month.

The highest temperature was 81 degrees at Collarendabri on the 15th, and the lowest 2 degrees at Charlotte Pass on the 21st.

August.—Excessive rainfall was experienced during August, and floods occurred in Coastal and Southern Inland rivers. Thunder and violent hailstorms were frequent, and snow fell on the Southern Highlands.

The highest temperature was 88 degrees recorded at White Cliffs on the 28th, and the lowest 2 degrees at Charlotte Pass on the 16th.

September.—Cyclonic conditions prevailed during the first ten days of September and heavy rain fell in Coastal and Northern Inland Districts. The remainder of the month was mostly dry with scattered thunder and hailstorms in the southern and eastern areas.

The highest temperature recorded was 103 degrees at Mungindi on 29th and the lowest 3 degrees at Charlotte Pass on the 3rd.

October.—Exceptionally heavy rains fell inland during October, many districts receiving record quotas for the month; but on the coast, however, the rainfall was slightly below normal. Torrential downpours on 24th and 25th caused widespread damage from floods, all rivers south of the Macquarie being affected.

Thunder and hailstorms were frequent and weather conditions were for the most part warm and humid.

The highest temperature was 93 degrees at White Cliffs and the lowest 14 degrees at Charlotte Pass.

November.—The heavy rains of the previous month continued into November, the southern half of the State receiving more than 100 per cent. above normal.

Considerable damage was caused to crops by flood, hail and wind. Two cyclonic disturbances developed during the month and seriously dislocated shipping. Nights were warmer than usual, but day temperatures were below normal.

The highest temperature recorded was 104 degrees at White Cliffs on the 25th and the lowest 27 degrees at Charlotte Pass on the 9th.

December.—Tropical depressions in this month were responsible for very heavy rainfalls, particularly in the Coastal and Tableland areas. Other parts of the State, however, were very dry, the far west recording no rain.

The cool conditions of the first half of the month gave place to an inland heat wave, with very sultry weather on the coast.

The highest temperature was 114 degrees at White Cliffs on the 23rd, and the lowest 29 degrees at Charlotte Pass on the 5th.

No. 110.—Monthly Rainfall, 1915-1934—Representative Stations in Divisions.

NOTE.—For monthly rainfalls at Representative Stations from the earliest date available in each case to 1906 see Statistical Register, 1924-25. In table No. 108 the average annual rainfall, over a period of years, is given at a number of stations.

NOTE.—(—) Denotes no record, and (...) no rainfall during the month.

No. 49.—Prospecting Votes, 1924-35.

Prospecting Vote.—The sum of £7,000 was voted for prospecting for gold in 1878; and in subsequent years, at irregular intervals further small sums were voted and expended. In accordance with a resolution of Parliament, an amount has been voted each year since 1887, during which year it was confined to searching for gold. In the succeeding year the conditions were amended so as to embrace all minerals.

NOTE.—This table does not include iron made from scrap, valued, to 31st December, 1935, at £1,416,030; lime, valued at £1,813,572; Portland cement, valued at £21,633,100 and coke valued at £16,998,167, respectively. Emeralds and turquoises have been found in small quantities, but no information is obtainable as to their value.

These figures represent the value of minerals won during the year, and therefore differ from those in Tables Nos. 67 and 69, which show the value (at the mines, and before treatment) of the output from mines in operation during the year.

* Includes all quarries from 1925. Prior to 1925, only those held under mining title were included.

NOTE.—Figures for the years prior to 1929 were taken from the Mines Department's Report.

* Duplication of persons employed exists to some extent, due to the movement of a number of Northern employees to the Southern and Western Districts during the prolonged stoppage, and their return on the re-opening of pits.

Section II.—VITAL STATISTICS.

NOTE. 1 From the beginning of 1927, *deaths* have been allocated to the locality in which the deceased permanently resided, when known, and *births* to the usual place of residence of the mother; consequently in this issue comparisons of these figures for any division cannot be made with those for years prior to 1927.

2 From the beginning of 1929 the municipalities of Auburn, Bankstown, Granville, Lidcombe and Parramatta were included in the Metropolis, and from the beginning of 1933 the Municipalities of Dundas, Ermington and Rydalmere, and Pitt and Merrylands wards of Holroyd municipality; consequently the figures for the Metropolis for 1929 and subsequent years cannot be compared with those for previous years.

3 Commencing with 1933, full-blood aboriginals have been excluded.

* The previous case of quadruplets was in 1913.

† The compulsory registration of still-births became operative on the 1st April, 1935. From that date all cases of plural births with still-born children were recorded as against a small number previously. These figures do not include the cases where both twins were still-born.

* From the beginning of 1927 deaths have been allocated to the locality in which the deceased usually resided when known, consequently these figures are not comparable with those published for years prior to 1927.

† From the beginning of 1929 the municipalities of Auburn, Bankstown, Granville, Lidcombe and Parramatta were included in the Metropolis, and from the beginning of 1933 the municipalities of Dundas, Ermington and Rydalmere, and Pitt and Merrylands wards of Holroyd municipality; consequently the figures for the Metropolis for 1929 and subsequent years cannot be compared with those of previous years.

*From the beginning of 1927 deaths have been allocated to the locality in which the deceased permanently resided when known, consequently these figures are not comparable with those for years prior to 1927.

the beginning of 1929 the Municipalities of Auburn, Bankstown, Granville, Lidcombe, and Parramatta, were included in the Metropolis, and from the beginning of 1933 the Municipalities of Dundas, Ermington and Rydalmere, and Pitt and Merrylands Wards of Holroyd Municipality; consequently the figures for the Metropolis for 1929 and subsequent years cannot be compared with those of previous years.

*Information not available.

All fatalities in which a motor vehicle is involved are included, as, for example, in the case of a collision between a motor car and a locomotive engine or a horse-drawn vehicle, etc., whether on a public road or private property.
For this reason the figures given here may differ from those supplied by other departments. where the question of blame is taken into account.
